### ***Response to Arguments***

Applicant's arguments with respect to claims 1-7, 9-13 and 19-22 have been considered but are moot in view of the new ground(s) of rejection.

### ***Drawings***

Replacement drawings were received on July 13, 2004. These drawings are approved.

### ***Claim Rejections - 35 USC § 103***

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 9 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brownhill et al. (US 5,875,189) in view of Bare (US 6,456,597).

1. Regarding claims 1, 9 and 19, Brownhill discloses a method in an ATM switch (abstract; fig. 1) comprising generating a connection table in a memory (figs. 7, 14 and 17), generating a multicast master entry in the connection table (fig. 17, connection entry) where the multicast master entry holds address locations at which multicast ATM cells are stored (fig. 17, pointers to read entries; col. 5, lines 39-48), generating multicast member entries associated with the multicast master entry (figs. 15, 19 and 21-22) where each member entry identifies a destination connection on which the multicast ATM cells are to be transmitted (fig. 21, item 66; col. 10, lines 40-52). However, Brownhill does not disclose a count field and a limit field for the multicast master entry to determine if the multicast master entry is inactive or faulty. Bare discloses a counter for determining whether a network transmission port is faulty (col. 19, lines

38-43). Therefore, it would have been obvious to one skilled in the art at the time the invention was made to have a count field and a limit field in the invention of Brownhill in order to disable a multicast master affected by network faults.

### ***Allowable Subject Matter***

2. Claims 2-7, 10-13 and 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
3. Claims 8, 14-18 and 23-25 are allowed.
